** This illustrates an interest rate and payments that are fixed for the life of the loan.

*** This illustrates payments that are fixed after the first five years of the loan at a higher amount because they include both principal and interest.

**** This illustrates minimum monthly payments that are based on an interest rate that is in effect during the first month only. The payments required during the first year will not be sufficient to cover all of the interest that is due when the rate increases in the second month of the loan. Any unpaid interest amount will be added to the loan balance. Minimum payments for years 2-5 are based on the higher interest rate in effect at the time, subject to any contract limits on payment increases. Minimum payments will be recast (recalculated) after 5 years, or when the loan balance reaches a certain limit, to cover both principal and interest at the applicable rate.
